ABOUT US

In 2003, Holztec established a joint venture company with Kneer, a German windows and window doors manufacturing company. Kneer has more than a hundred years of experience in operating wooden windows and window doors factories in their homeland German.

The objective of this joint venture was to invest in state-of-the-art computerized woodworking machines and systems, with the aim of producing the highest quality products for both the European and the Egyptian market.

We work hard to meet the changing needs of customers nationwide by manufacturing the most reliable, low maintenance and durable products.

Customer satisfaction is what defines our work and governs our goals.

MISSION & VISION

The mission of Holztec is dedication to the highest quality of customer service delivered with a sense of warmth, friendliness, individual pride, and company spirit. We strive to grow our business with the same honesty and integrity we use to craft our products, with elegancy and perfection. We aim to build the best product and fulfilling our customer needs & requirements, thus implement solutions for a better living experience.

We strive to be recognized and perceived as the best living spaces supplier throughout the MENA region, where clients can receive a noteworthy product with the best quality of service ever delivered.

OUR PRODUCTS

Holztec manufactures German hand crafted windows and doors The unmatched quality of our product is high in sealing, sound insulation & protection against the environment. Holztec uses State-Of-The-Art machinery to manufacture quality products complying with the German DIN Standards 68 121//IV68. The product meets European quality standards for temperature and sound proofing.

WINDOW

WALL CLADDING

1. TILT & TURN

Holztec Tilt and turn windows and doors have the perfect and elaborate combination of natural material and latest technology that guarantees unique quality. Holztec tilt and turn windows and doors are not only a distinctive piece of wood but a perfectly constructed piece of technology that is beautifully crafted.

2. TILT & SLIDE

The tilt and slide windows combine the sophistication of the German sliding mechanism incorporated with the tilt feature that allows for more ventilation. Other features include a range of solid colours and also a range of handle colours to complement your windows. We also offer a wide range of glass features and designs custom made especially for you.

3. LIFT & SLIDE

The Holztec lift and slide door is the most innovative doors on the market today; designed using state-of-the-art technology.

Not only does it have the tilt option but it is also designed with the strict insulation guidelines in mind.

4. FOLDING

The most advanced European folding door on the market today. It can function as a French door when only the two center sashes are used.

PRODUCT SPECIFICATIONS

Wood: There are 3 laminated layers of compressed Meranti wood. The reflling of the wood laminated is Profle 86 X 72 mm.

System: According to the German Industrial Association standards, DIN. 68 121/IV68.

Sides: Outer frame 80/66 mm Leaves made of wood with profile 80/66 mm Wood painted with special water base paint.

Rain Rail protectors: Aluminium rails are used to protect the wood from rain and water. These stripes of aluminium are covered from both sides with plastic covers to prevent water and air leakage.

PAINT SPECIFICATIONS

The paints are imported from a Belgian company that is according to the international standards.

The wood is painted with three layers with special water based paints.

Our paint is waterborne paint for the priming of windows and doors.

The frst layer (basic) used is to treat the wood and protect it from insects and bugs.

The second layer (fller) in this phase is used to paint the wood with flling color to fll all the holes and protect the wood from water leaking.

The fnal layer (color) in this phase is used to paint the wood which gives the wood the designed color according to the costumer need.

HARDWARE & FITTING

Holztec hardware system is designed to bring back the era that celebrate the balance between extraordinary taste & functionality.

Our Roto and Siegenia hardware systems are made out of steel and for highly stressed hinges out of steel with quality.

Holztec's line of hardware which is forged, hammered, milled, & fnished with International German Standards, is available in various shapes and colors to satisfy all customers' needs.

SILICONE SPECIFICATIONS

The Silicon used is particularly suitable for the sealing of windows, connecting joints and other movement joints.

It offers long-term, good adhesion to most non-porous surfaces such as coated or glazed wood, glass and glazed surfaces. It is available in a wide range of colours.

RUBBER SPECIFICATIONS

The rubber used is the all-rounder amongst the sealing profles. It guarantees optimum sealing tightness and there are stabilization lips that strengthen the position .

Moreover, it has an optimum head width that provides a greater tolerance range. It also has a hollow chamber lip profile for clearly visible deflection recovery of the seal, in addition to the fact that it is environmentally friendly.
